

ReMeDi

Enabling Healthcare. Anytime. Anywhere.

Enabling Access to **Quality** & **affordable healthcare** to masses in rural and remote areas through **Technology**

ReMeDi® Platform

The ReMeDi® Platform is a cloud-based telemedicine application that connects doctors, nurses, and administrators across multiple ecosystems. It supports seamless consultations, diagnostics, and prescriptions, with offline functionality for areas lacking connectivity, ensuring efficient healthcare delivery in remote regions.

Cloud-Based Telemedicine Application

Point-of-Care Diagnostics

ABDM Compliant and eSanjeevani Ready

Multi-Platform Integration

Offline Mode Capability

Comprehensive Management Information System (MIS)

- Facilitates free quality health services and specialized health services to rural and isolated areas across India.
- Helps to control infectious diseases by avoiding unnecessary visits to the hospitals.
- Facilitates faster decision making by policy makers on optimized utilization of human resources and medical infrastructure.
- Ensures digitization and maintenance of health records of patients for ease of usage in the future.

ReMeDi
Enabling Healthcare. Anytime. Anywhere.
